# Requirements

# Project Requirements

01 — Must use at least two new server-side APIs

02 — Must use a CSS framework *other than* Bootstrap

03 — Have a quality README (unique name, description, screenshots, etc.)

04 — Must have a clean, polished, responsive UI

05 — Must meet good quality coding standards (indentation, scoping, naming, etc.)

06 — Does NOT use alerts, confirms, or prompts (look into *modals*).

07 — Must be deployed to GitHub Pages

08 — Must be interactive (i.e: accept and respond to user input)

# Presentation Requirements

You will be responsible for preparing a formal, 10-minute presentation that covers the following:
(note: every team member is expected to speak during the presentation, business casual attire)

**Elevator pitch:** a one minute description of your application

**Concept:** What is your user story? What was your motivation for development?

**Demo:** Show your stuff!

**Process:** What were the technologies used? How were tasks and roles broken down and assigned? What challenges did you encounter? What were your successes?

Directions for Future Development
